About Us

Smart Rivers Computing Trading Co. is a leading IT infrastructure and low-current systems integrator based in **Al Khobar, Kingdom of Saudi Arabia**. The company specializes in providing IT services and solutions to small, medium, and enterprise-scale businesses across the Kingdom.

Information technology is now an essential requirement for nearly every business. Through our unique understanding of business requirements, we are not only able to suggest more cost-effective and efficient solutions, but also work with organizations to upgrade in a phased manner to reach the desired levels of IT competency.

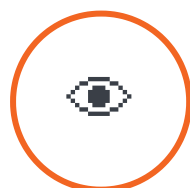

We design, supply, and implement end-to-end IT infrastructure, structured cabling, network systems, CCTV, cybersecurity, and AV solutions. Our team of certified professionals ensures that every project meets the highest standards of quality, reliability, and performance — from design through commissioning and post-deployment support.

OUR PRODUCTS & PARTNERS

We work exclusively with globally recognized brands to guarantee quality, reliability, and full warranty coverage:

VISION

Honesty, integrity and loyalty. ▶ Exceeding customer expectations ▶ Doing what it takes to get a job done right and on time
▶ Continuous improvement through our quality-assurance process ▶ Dedication to the highest standards
▶ Transparency, collaboration and understanding — the customer's needs are the keys to success, promoting the growth of our people and our company.

MISSION

To build strong, lasting and dependable relationships with our customers, employees, suppliers and communities through a genuine commitment to our core values — delivering technology solutions that empower every client's growth.

OUR SERVICES

CCTV & Surveillance

Surveillance equipment has advanced over the years, giving us the edge to deliver intelligent surveillance solutions. We offer a wide range of options suitable for residential, commercial, industrial or metro environments:

- ▶ IP cameras (PTZ, Bullet, Dome)
- ▶ Analogue cameras
- ▶ Face-recognition cameras
- ▶ Temperature-screening cameras
- ▶ Number-plate recognition cameras
- ▶ Remote viewing on smartphone / tablet

Let us put access control at your premises so that sharing keys can be a thing of the past — Biometric and RFID solutions with time-based access.

DATA BACKUP & RECOVERY

Our backup and replication tool delivers availability for all your workloads. Through a single management console we manage simple, flexible and reliable recovery and replication of all your applications and data.

SERVERS

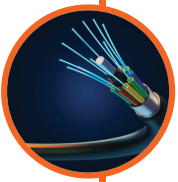

Windows, Linux and UNIX servers just a call away — be it Domain controllers, File servers, DNS, Web servers or NAS.

MANAGED SERVICES

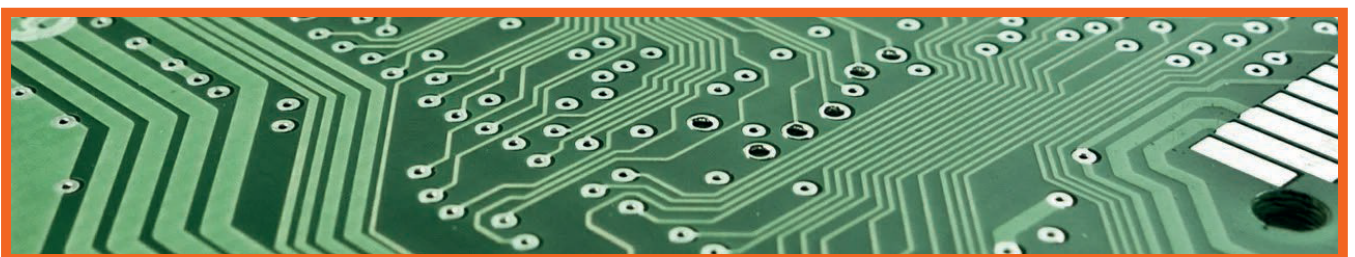

We are the proactive managed-service partner at your disposal, offering a complete range of technical support:

- ▶ 24/7 IT support — engineers available after hours, weekends & public holidays
- ▶ Remote support, assistance, monitoring & management
- ▶ Ad-hoc, preventive maintenance & contractual SLA

STRUCTURED CABLING

Turnkey cabling solutions for dependable voice and data networks. We deliver structured cabling on CAT6/6a, plus fibre-optic cabling, splicing, OTDR testing, Fluke certification and maintenance of fibre-optic networks.

SOFTWARE SOLUTIONS

We incorporate a wide range of software products from leading OEMs, enabling optimum performance environments. We equip any business with the right tools to enable productivity and collaboration — with end-to-end security solutions that mitigate potential threats to company data.

TELECOMMUNICATIONS & REMOTE ACCESS

We offer PABX and VoIP solutions for effective, efficient communications. VPNs enable you to access company data from virtually anywhere as long as you have an internet connection — let us design, secure and implement a VPN solution that works for you.

DOMAIN REGISTRATION & WEBSITE HOSTING

Let us take care of your domain registration, website hosting and email administration & hosting — all at a very comfortable cost.

Microsoft Services

Microsoft offers a wide range of digital services that empower organizations to achieve their technological goals — cloud computing through Microsoft Azure, productivity tools like Microsoft 365, and advanced AI & data-analytics capabilities. We provide specialized consulting and technical services in digital transformation, cybersecurity, application development and infrastructure management, along with technical support and training that enable customers to use these technologies effectively while ensuring top-tier security and compliance.

Cybersecurity Consulting Services

We provide comprehensive, specialized cybersecurity consulting designed to protect your organization from evolving digital threats and enhance your cyber-readiness in line with global standards:

- Designing and implementing cybersecurity governance frameworks aligned with NCA and ISO 27001
- Securing cloud infrastructure through advanced access control, encryption and continuous monitoring
- Strategic consulting for safe cloud migration and operational optimization
- Protecting sensitive data using encryption and digital-rights management
- Deploying cloud, on-premises and offsite backup for business continuity
- Conducting thorough risk assessments and vulnerability analyses

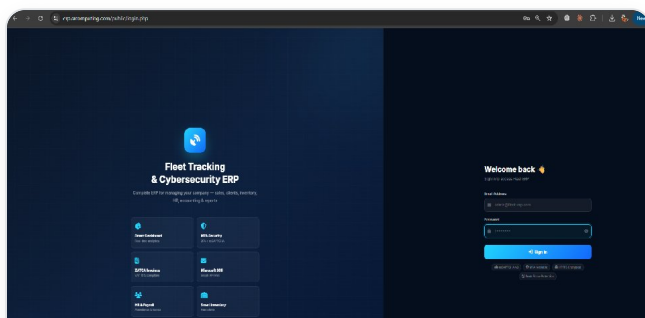

Network Solutions & Management

We deliver professional network solutions designed to build secure, scalable IT infrastructures that support business continuity and digital transformation — including the design and implementation of local and wide-area networks, hardware installation and configuration, configuration management, and continuous performance monitoring. We utilize advanced technologies such as VLAN, VPN and SD-WAN to ensure flexible, secure connectivity, with intelligent centralized monitoring, emergency-response planning and ongoing technical support for optimal network readiness at all times.

OUR DIGITAL PLATFORMS

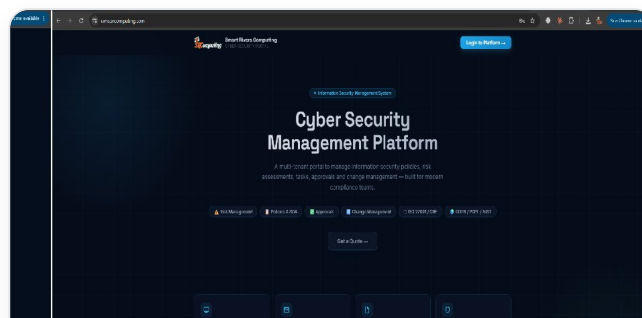

Beyond infrastructure, Smart Rivers Computing develops and operates its own cloud platforms — purpose-built SaaS systems that give our clients measurable control over operations, security, compliance and support.

Fleet Tracking & Cybersecurity ERP

erp.srcomputing.com

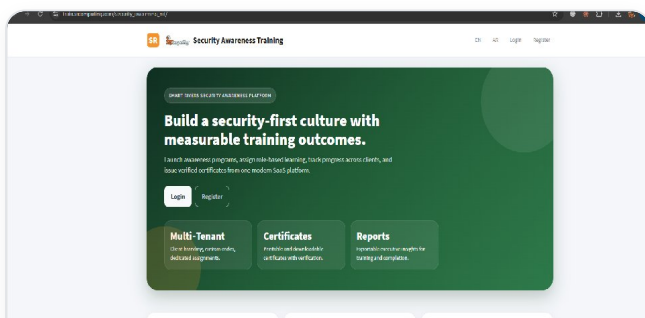

A complete ERP for managing your company — sales, clients, inventory, HR, accounting and reports. ZATCA-compliant e-invoicing, MFA security and Microsoft 365 integration in one smart dashboard.

Cyber Security Management Platform

isms.srcomputing.com

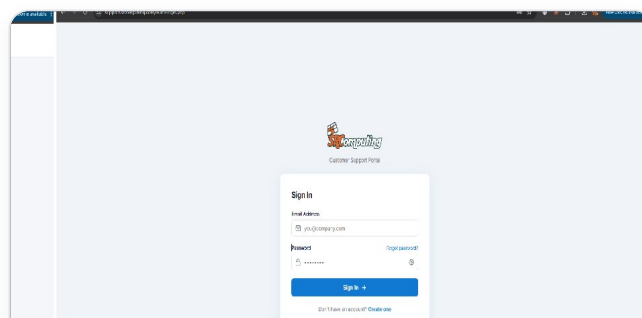

A multi-tenant portal to manage information-security policies, risk assessments, tasks, approvals and change management — built for ISO 27001, GDPR, PDPL and NIST compliance teams.

Security Awareness Training

train.srcomputing.com/security_awareness_mt

Build a security-first culture with measurable outcomes. Launch awareness programs, assign role-based learning, track progress across clients and issue verified certificates — white-label ready.

Customer Support Portal

support.srcomputing.com

A dedicated portal for ticketing, service requests and SLA tracking — giving clients a single, branded place to reach our 24/7 technical support team.

OUR CUSTOMERS

Smart Rivers Computing serves small, medium and large private- and public-sector organizations where technology plays a critical role in business — with a proven track record alongside major Saudi corporations including **Saudi Aramco** and **AlKhorayef Industries**.

Industries we serve:

- ▶ Construction & Property Development
- ▶ Healthcare & Medical
- ▶ Education
- ▶ Hospitality
- ▶ Retail
- ▶ Security & Vehicle Tracking
- ▶ Finance
- ▶ Oil & Gas / Petroleum
- ▶ Real Estate
- ▶ IT & Telecommunications

PROJECT PORTFOLIO

Selected projects delivered (2022 – Present):

#	Client / Project	Contract	Scope of Work
1	TSM Stations (15 Stations)	CLC / RMC	Data switches, cabinet, cabling, access points, configuration, splicing, OTDR report, Fluke test
2	Ettifaq Club	Direct	Data switches, cabinet, cabling, access points, cyber-security office, AV, UTM — Digital Transformation partner
3	PKF – Ibrahim Ahmed AlBassam & Co.	Direct	3 data centers (Khobar, Riyadh, Jeddah), 15+ servers, 80 access points, VPN across branches, 600+ users
4	DarWa Emaar Real Estate	Direct	Data center setup across 5+ locations, 25 switches, 120 access points, VPN between branches
5	AL-Lulu Medical Complex	Direct	Network low current, CCTV, servers, backup solution, cyber-security, AV, UTM
6	Al Mosa Hospital	Direct	Data center relocation
7	Gulf Address Real Estate	Direct	33,000m fiber + 26,000m fire-alarm + 8,000m network cable, 100 outdoor cameras, 34 speakers, 2,350-core fiber splicing, 42U cabinets, CAT6a
8	Mofarreh AlHarbi & Partners	Direct	5+ locations, 25 switches, 120 access points
9	Addoha Poultry Company	Direct	Network low current, Wi-Fi, CCTV
10	Alwakeel Aluminium Factory	Direct	Network & CCTV, servers, backup, cyber-security, AV, UTM
11	AL Faraby Medical Center	Direct	Network & CCTV, servers, backup, cyber-security, AV, UTM, VPN across branches
12	AL Tammimi Global Company	Direct	Servers, backup solution, cyber-security, AV, UTM
13	AlKhorayef Water & Power	Direct	Network & CCTV across 8+ locations, 168 cameras (PTZ/Bullet/Dome), 25 switches, 120 APs
14	Saudi Aramco	Direct	Supply & installation of IT infrastructure for Aramco stations — network cabling, switches, access points, structured cabling
15	AlKhorayef Industries	Direct	Full IT infrastructure supply & installation — data network, structured cabling, access points, systems integration
